Abstract

PURPOSE: To save space and to improve operativity by providing a terminal device near a work desk and connecting it to a workstation controller through a local source terminal interface device.

CONSTITUTION: A workstation 12 is provided with a local source terminal interface device 17. A control part 19 of a local terminal device (desk side terminal) such as a personal computer, etc., is connected to a workstation controller 13 through the interface device 17. Keyboard signals inputted using a keyboard 15 of the workstation 12 are transmitted to the control part 19 of a desk side terminal through the interface device 17. The video signal from the control part 19 of the desk side terminal is displayed on a display part 14 of the workstation 12. So, the space for a keyboard of a desk side terminal and a display part on a work desk is saved.
